

Ohio Timber Price Report

Fall 2021 to Spring 2022 Comparison

This report was funded in part by the Renewable Resources Extension Act

Response rate for July 2022 report was low, resulting in low to nonexistent data for some species. While some respondents reported a good market, many reported problems due to wet weather. Prices were lower generally for most species and grades, except for prime grade logs of walnut, white oak and hard maple. Comments from some participants also echoed a certain level of anxiety about the future of the market. Some respondents reported being cautious in case of a possible future downturn in the market.
